

The new fms version 8.8.0 with facelift!

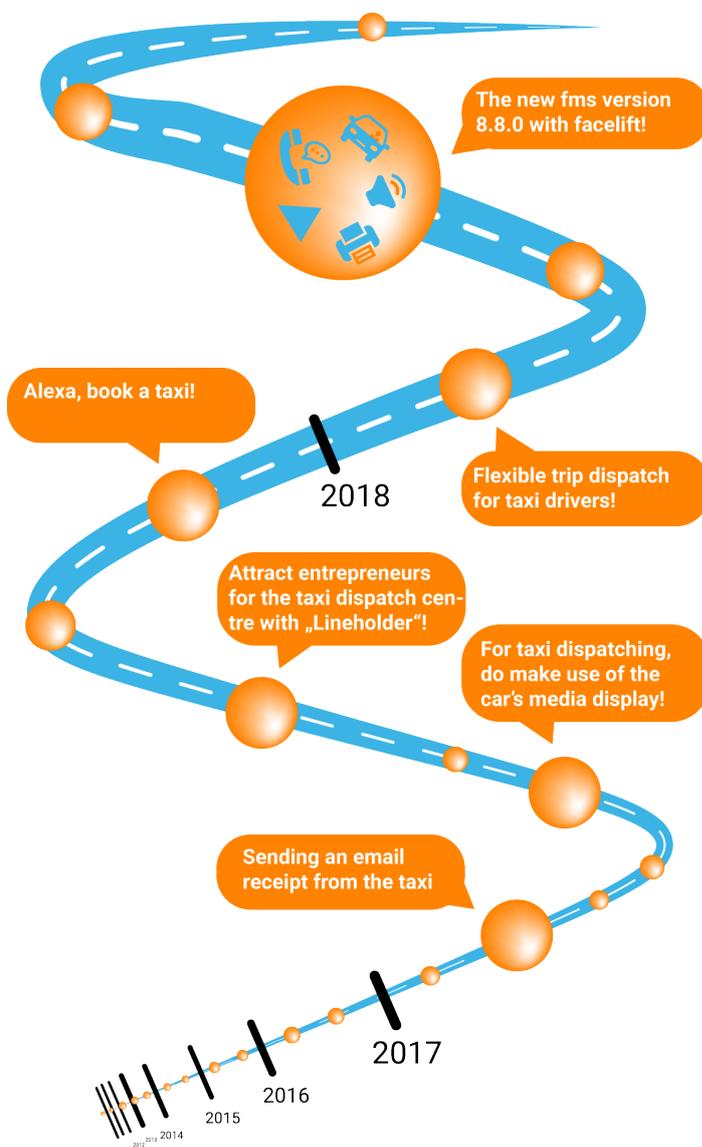

Your fms-Guide Mike

"After an **intensive development and testing process**, fms/Austrosoft launches the new version 8.8.0. It is gradually being implemented in all dispatch centers. In addition to many functional improvements, there are also optical changes.

Indeed, with the transition to the most recent development environment, the user interface has been reviewed and updated. In this way, the user interface of the fms software translates its intrinsic values: **Innovation, reliability and investment security.**"

Up-to-date information for
fms dispatch centers

System stability that stands out!

For years fms/Austrosoft has been proud to cooperate with you to improve your business success. In doing so, fms/Austrosoft's mission is to provide you with the most reliable and efficient trip dispatch technology to meet all your business challenges.

To guarantee this, fms/Austrosoft is continuously developing the fms system. As part of the fms innovation push in 2017, a total of 780 improvements and optimizations have been implemented for your dispatch center.

Even if you have not immediately noticed all the new developments, you still have the possibility to use the new features for the success of your business. Among the developments that are not immediately apparent, the continuous optimization of the system stability is one of the pillars of the continuous work of fms/Austrosoft. This is the basis for a stable, reliable trip dispatch system with a high degree of investment security.

I would be pleased if you would continue to trust in fms/Austrosoft. As usual, please send your comments, including on the new user interface as well as your development suggestions.
