

## Pay in the taxi with Amazon Pay and Apple Pay!

Your fms-Guide Mike

fms dispatch centers are ready for App-Payment with Apple Pay and Amazon Pay. The two major providers will redefine the payment system in the future. Many partners have already signed the contracts and are now involved right from the start.

The passenger payment thus corresponds to the most current customer wishes.

### fms App Payment made easy: This is how it works for the driver

**1**

First call the payment menu. The driver clicks the menu item: app payment.

**2**

Now the fare menu appears. The driver enters the fare from the taximeter and clicks OK.

## Pay in the taxi with Amazon Pay and Apple Pay!

3

Optional: If the passenger has ordered his trip via the customer app and the server recognizes him, payment is made automatically and this step is omitted. If it is a hailed trip, an authorization code is generated, which the passenger has to enter in his customer app under the menu "Pay for trip".

4

After successful payment, the receipt can be printed out. Voilà, the payment process via app payment has been completed.
